

# STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. REID:

S. 1564. A bill to convey land to the University of Nevada at Las Vegas Research Foundation for a research park and technology center; read the first time.

Mr. REID. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1564

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

## SECTION 1. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) the University of Nevada, Las Vegas, needs land in the greater Las Vegas area to provide for the future growth of the university;

(2) the proposal by the University of Nevada, Las Vegas, for construction of a research park and technology center in the greater Las Vegas area would enhance the high tech industry and entrepreneurship in the State of Nevada; and

(3) the land transferred to the Clark County Department of Aviation under section 4(g) of the Southern Nevada Public Land Management Act of 1998 (Public Law 105-263; 112 Stat. 2346) is the best location for the research park and technology center.

(b) PURPOSES.—The purposes of this Act are—

(1) to provide a suitable location for the construction of a research park and technology center in the greater Las Vegas area;

(2) to provide the public with opportunities for education and research in the field of high technology; and

(3) to provide the State of Nevada with opportunities for competition and economic development in the field of high technology.

## SEC. 2. CONVEYANCE TO THE UNIVERSITY OF NEVADA AT LAS VEGAS RESEARCH FOUNDATION.

(a) CONVEYANCE.—Notwithstanding section 4(g)(4) of the Southern Nevada Public Land Management Act of 1998 (Public Law 105-263; 112 Stat. 2347), the Clark County Department of Aviation may convey, without consideration, all right, title, and interest in and to the parcel of land described in subsection (b) to the University of Nevada at Las Vegas Research Foundation for the development of a technology research center.

(b) DESCRIPTION OF LAND.—The parcel of land referred to in subsection (a) is the parcel of Clark County Department of Aviation land—

(1) consisting of approximately 115 acres;

(2) located in the SW ¼ of section 33, T. 21 S., R. 60 E., Mount Diablo Base and Meridian; and

(3) identified in the agreement entitled "Interim Cooperative Management Agreement Between the United States Department of the Interior—Bureau of Land Management and Clark County", dated November 4, 1992.

By Mrs. FEINSTEIN (for herself, Mr. WYDEN, Mr. FEINGOLD, Mr. CORZINE, Mr. HARKIN, and Mr. LEAHY):

S. 1565. A bill relating to United States adherence to the ABM Treaty; to the Committee on Armed Services.

Mrs. FEINSTEIN. Mr. President, I rise today to introduce legislation regarding the testing, development, and

possible deployment of a National Missile Defense system. This legislation is cosponsored by Senators WYDEN, FEINGOLD, CORZINE, HARKIN, and LEAHY.

I share the concern of many of my colleagues that, in the aftermath of the horrific events of September 11, this is not the appropriate time or place for a divisive debate on the Senate floor on missile defense.

That is why I did not offer this legislation as an amendment on the Defense authorization bill, do not intend to offer it as an amendment on other legislation before the Senate at this time, and do not intend to push this legislation for a vote at this point in time. This is not the time for Senate consideration of this legislation or for a divisive debate on this issue.

But I also believe that it is critical that at the appropriate time, and in the appropriate way, a full public and congressional debate on missile defense must occur. It is simply too an important a decision, and too important an issue, to be treated in any other way.

Indeed, National Missile Defense is one of the most serious foreign policy and national security issue that we will face in the coming decades. The administration's decisions on this issue should be made deliberately, in consultation with our allies, and, most importantly, in consultation with the United States Congress.

As one Senator, I myself have spent considerable time over the past several years in meetings, briefings, and discussions on this issue. Earlier this year I had the opportunity to discuss missile defense issues at length with former Secretary Perry.

He suggested to me that the proliferation of nuclear, chemical, and biological weapons of mass destruction, and the increasing availability to other nations as well as transnational groups such as terrorist organizations, of the technology and material necessary to develop and deliver WMD is perhaps the most serious threat to U.S. national security today.

Secretary Perry went on to argue, however, that National Missile Defense is not and should not be seen as a one-size-fits-all substitute for an effective non-proliferation strategy, and that the United States must have a balanced program to effectively safeguard our interests. This includes effective strategies for the prevention of proliferation, deterrence, homeland defense, and counter-proliferation, and clearly calibrating and allocating resources to meet the real challenges that face U.S. national security interests.

I believe that the approach suggested by Secretary Perry makes a good deal of sense.

Based on this approach, I believe that it is therefore important for Congress to ask a number of questions with regard to NMD. Questions such as:

Would missile defense have helped to prevent the events of September 11?

Are there more immediate security needs, such as homeland defense, which

demand priority on our scarce national defense and national security resources?

Is NMD an appropriate to serve as the central axle around which U.S. national security rotates, given the nature of the threats we now face?

Would unilateral U.S. withdrawal from the ABM Treaty hurt U.S. efforts to get international cooperation in the battle against terrorism?

Will acquiring NMD make the United States, and the world, safer and more secure? Or will unilateral U.S. development and deployment of NMD, and unilateral violation, abrogation, or withdrawal from the Anti-Ballistic Missile Treaty, make us less safe and secure?

I am also concerned that with what appears to be a rush toward construction at Fort Greely, AK, the administration has already made a decision on deployment, without having yet answered these bottom line questions.

The legislation that I and my colleagues introduce today seeks to address these questions, and to suggest that the balanced approach suggested by Secretary Perry to safeguarding the United States from the threat of WMD attack might be a wiser policy for Congress to consider, rather than merely rubber-stamping the administration's missile defense policy.

This legislation would: express the Sense of the Senate that U.S. research and development of missile defense remain consistent with the ABM treaty, that the U.S. should pursue good faith negotiations with Russia to make such modifications to the ABM as may be necessary, but that the U.S. should not unilaterally opt-out of the treaty and not deploy a missile defense system that has not met the basic research, testing, and evaluation standards to prove its operational effectiveness.

Place a limitation on funding available for missile defense testing, evaluation, or deployment that would unilaterally abrogate or violate the ABM treaty.

Call on the Secretary of State to report to Congress, if a decision on deployment is made, regarding the nature of the threat that triggered the deployment decision and the likely impact that the deployment decision will have on U.S. national security interests.

Call on the Secretary of Defense to report to Congress, if a decision on deployment is made, on the operational effectiveness of the missile defense system.

Call on the President to make an annual report to Congress on the nature of the WMD threat faced by the U.S. and its allies, evaluate the threat posed by different means of delivery, ranging from ballistic missiles to suitcase bombs, provide an estimation for the total cost of development and deployment of missile defense, and make a determination whether missile defense spending adversely impacts other priority national security programs of the Department of Defense.
